

Special eBlast . . .

From the desk of C. David Copenhaver

MRSPA has requested we share the following with our members...

The Maryland Caregivers Support Coordinating Council (MCSCC) is seeking family caregivers to complete an anonymous online survey. This is your opportunity for your voice to be heard. The results of this survey will be used by the MCSCC to support State offices, agencies, community groups, our Governor, the Maryland General Assembly, and family caregivers like you. To be effective, we need your advice on the needs of family caregivers and the best ways to meet those needs. So, we welcome your voluntary participation and feedback through the attached survey.

The survey should take approximately 15 minutes or less, and will ask questions about the care you provide to your loved one, how caregiving has impacted your life, and your needs as a family caregiver.

Are you a family caregiver? A family caregiver is someone who helps an adult or a child with a disability with personal care, household chores, money management, arranging for outside service arrangements, or visiting regularly to see how they are doing.

Should you complete this survey? The person receiving care may live in Maryland or outside of Maryland. Anyone who is a family caregiver and is 18 years or older is eligible to participate in this survey. Please feel free to forward this invitation to your family, friends, and colleagues. We realize your time is valuable, and appreciate your consideration.

If you provided this type of unpaid help to a relative or friend within the past 12 months, please complete the survey. Thank you!

Please follow the link below to take the survey: It will remain active until 12/ 31/ 2014. The link <http://www.surveymonkey.com/s/dhrcaregiver>

Many thanks,

David

Wishing you a Happy Holiday!

Enjoy Family and Friends This Special time of year!
